

Arabium

White paper

Introduction

In today's global financial landscape, new opportunities are emerging that challenge traditional economic systems by offering more accessible, transparent and equitable instruments.

Arabium was born from this very vision: a revolutionary digital currency, designed not only as a financial tool, but as a catalyst for economic independence and development for Arab peoples.

The Arabium currency represents more than just a digital asset; it is a step toward a future in which communities can break free from traditional, often inequitable and ineffective financial systems and embrace a more just and inclusive system.

With Arabium, we propose an alternative economic model that values equity and transparency, laying the foundation for sustainable economic independence. Arabium is distinguished by its unique and thoughtful structure.

With a total of 9 billion tokens, its distribution is designed to maximize impact and stability.

From PancakeSwap to Uniswap, from locked liquidity to the project expansion fund, every aspect of Arabium was designed with a clear goal in mind: to create a currency that not only grows in value, but also supports and nurtures the development of entire communities.

The Foundations of Change

The Arabium project, currently in its early stages, requires the support of visionary investors who understand the importance and potential of such an initiative.

With a roadmap geared toward steady and adaptive progress, Arabium is not just an investment, but a promise for a more equitable and prosperous future.

In this whitepaper, we outline our vision, token structure, technical details and roadmap for the Arabium project.

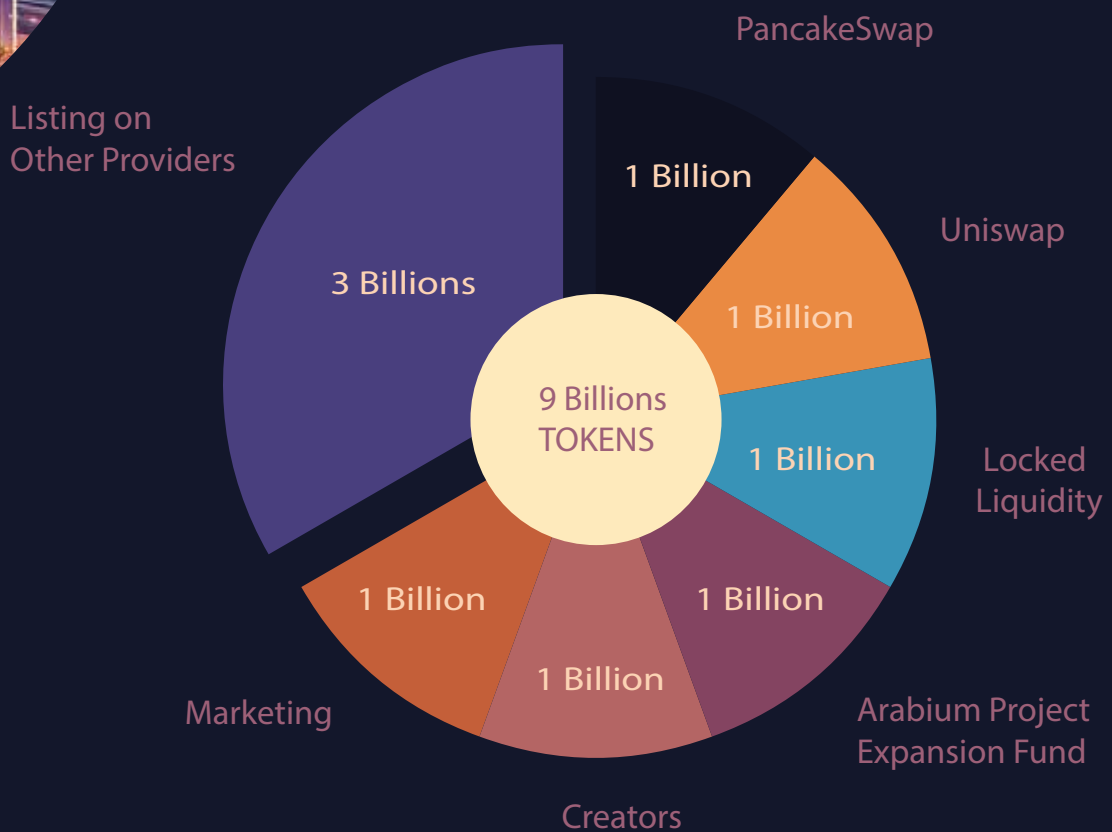

We invite you to join us on this exciting journey toward creating a financial ecosystem that enhances every member of the community,

sparking a new chapter of economic independence and innovation.

Welcome to the world of Arabium.

Arabium Token: Structure & distribution

One of the most crucial aspects of a cryptocurrency's success is its token distribution plan.

Arabium has been meticulously designed with a distribution strategy that balances market growth, liquidity, and ongoing support for the project and its community.

With a total of 9 billion tokens, Arabium's distribution is planned as follows:

Listing on Other Providers

Expansion and Accessibility:

Lastly, 3 billion tokens are allocated for listing on other exchange service providers.

3 Billions

This strategy aims to maximize the availability and accessibility of Arabium, ensuring it is easily tradable on a wide range of platforms, thereby increasing its relevance and adoption in the cryptocurrency market.

PancakeSwap

Distribution on PancakeSwap:

1 billion Arabium tokens are allocated to PancakeSwap, one of the most popular decentralized exchange (DEX) platforms.

1 Billion

This not only provides immediate and easy access for buyers but also ensures essential initial liquidity for the health and stability of the token.

Uniswap

Presence on Uniswap:

1 billion Arabium tokens are designated for Uniswap, another highly prominent DEX in the cryptocurrency sector.

1 Billion

Presence on both platforms, PancakeSwap and Uniswap, ensures greater visibility and accessibility for investors from different regions and preferences.

Locked Liquidity

Securing Liquidity:

1 billion tokens are locked as liquidity.

This serves to stabilize the token's value and instill confidence in investors, demonstrating our commitment to preventing excessive volatility and ensuring a solid foundation for the token's value.

Arabium Project Expansion Fund

Investing in the Future: 1 billion tokens are reserved for the Arabium project expansion fund.

These funds will be used for the ongoing development of the project, including research and development of new technologies, network expansion, and funding strategic initiatives for long-term growth.

Marketing

Promotion and Awareness:

Essential to the success of Arabium is a robust marketing plan.

By assigning 1 billion tokens to marketing, we ensure the capability to reach a broad audience, creating awareness and stimulating global adoption.

Creators

Supporting Creators:

Allocating 1 billion tokens to creators underscores our commitment to supporting innovators and collaborators who contribute directly to the Arabium project.

This incentive is crucial for attracting and retaining exceptional talents that will carry forward the vision of Arabium.

Burn Mechanism & Fee Structure of Arabium Coin

1% Burn Rate on Transactions

Burn Mechanism and Fee Structure of Arabium Coin

A key aspect of Arabium's design is its innovative approach to transaction fees and token sustainability.

Our model includes a 1% burn rate and a 6% transaction fee, distributed in a way that supports the ecosystem, the creators, and charitable causes.

6% Transaction Fee Allocation
Supporting the Ecosystem and Beyond:

2% to Creators:

To foster innovation and reward the contributions of creators who are integral to the Arabium ecosystem, 2% of the transaction fees are allocated to them.

This not only incentivizes creativity and contribution within the Arabium community but also ensures ongoing development and enrichment of the ecosystem.

2% to Charitable Causes:

2% to Charitable Causes:

Reflecting our commitment to social responsibility, another 2% of the transaction fees are dedicated to charitable organizations.

This aspect of our fee structure allows Arabium to have a real-world impact, supporting causes that align with our values and mission of empowering communities.

Work in Progress >>>

2% for Other Purposes:

The remaining 2% of the transaction fees are reserved for other essential purposes, such as operational costs, further development of the Arabium network, or contingency funds.

This ensures the smooth functioning and scalability of the Arabium project.

Arabium: Uniting and Revolutionizing Cryptocurrency - A Journey of Innovation and Community

The Genesis: Laying the Foundation for the Future

Our odyssey begins with the birth of Arabium

- more than a currency, a promise.

We are building an intuitive site and a project that reflects our vision:
a platform where every voice matters, where the White Paper is not just
a document, but the manifesto of a financial revolution.

The Innovative Turn: A Fundraising to Change the Game

Every contribution is a brick to build the temple of Arabium's innovation:

Arabium Blockchain - The Beating Heart: Not just a blockchain,
but a technological masterpiece, secure as a fortress,
fluid as a river.

Arabium Swap - The Midas Touch: A trading platform where each transaction is
an experience, fast as thought, secure as fate.

Arabium Exchange - The Global Stage: Not just a market,
but a universe where each Arabium shines like a star.
Additional Steps to Enchant the World:

Custom Arabium Wallets: More than a wallet, a personal guardian for your Arabium.

Exclusive Partnerships: Joining forces with giants and pioneers
to take Arabium beyond the stars.

Advanced Education Programs: To transform every user into an expert,
and every expert into a visionary.

The Endless Vision: Building Tomorrow, Today

Every Arabium purchased is a vote for a future where finance is democratic,
accessible, and revolutionary. With each update,
we will bring on board brilliant, visionary minds, not just to follow,
but to create the trends of tomorrow.

Join the Arabium Revolution

Arabium is not just an investment;
it is a battle cry for a brighter future,
a world where every individual can make a mark.

Arabium is more than a currency, it's a dream becoming reality.
Join us, and together let's write history.
